

TOP — this edge comes out of the printer first

100 x 150 mm TEST LABEL

100 x 150 mm (A6-width roll) · print at 100% / Actual size

1. 0 to 80 on the mm ruler measures exactly 80 mm.

Shorter means it was shrunk: set Scale to 100% (Windows: Actual size).

2. All four sides of the thin frame are printed.

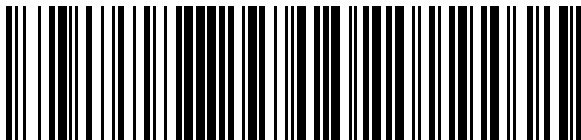

A side missing means margins in the paper size: set all four to 0.

3. TOP is at the edge that came out first, reading upright.

Sideways means the page or the print dialog rotated it.

4. The square is solid black and every line is unbroken.

Grey or gaps: raise print density, or clean the print head.
